EDUCATION

Indian Institute of Technology,Varanasi , Bachelor of Technology : **7.75 CPI**   **2018 -2022**

Kendriya Vidyalaya No. 1 Ajmer , Senior Secondary School : **89.00 %**   **2015 -2017**

WORK EXPERIENCE

Persistent Systems   **June 2022 - Jan 2024**

Software Engineer

- **FrontEnd Engineer** for the Budgeting Platform team.Primarily worked using Javascript , React.js.
- Platform designed to meticulously track and manage all dimensions of project finances, including Budget, Revenue, Costs, and Margin across different organizational levels such as Account, Delivery Unit (DU), Business Unit (BU), and Organizational Unit (OU).
- Collaborated on implementing a user-friendly dashboard and search capability, offering users the flexibility to explore data by project, account, DU, BU, and OU.
- Successfully implemented monthly and quarterly comparisons across all aspects of a project budget, elegantly showcased through visually engaging bar and line graphs. This enhancement not only provides stakeholders with comprehensive insights but also elevates the user experience by presenting complex data in an intuitive and accessible format.
- Worked on code maintenance, adding features,incident management and fixing bugs in the system.
- Currently focusing on optimising code and performance by employing effective techniques for reducing latency.

PERSONAL PROJECTS

Travelling WebSite

- **Website Link Github Link**
- Feature-rich travel app covering everything from a sleek UI to mobile-first best practices.
